

Total transport solutions

DAF Trucks enables the transition to electric driving by combining its expert knowledge, experience across a wide range of applications and deep understanding of customers' businesses. This results in tailor-made transport solutions that meet customer needs and exceed their expectations. Our solutions include vehicles, services, charging infrastructure, bodybuilder support, extensive dealer network coverage and aftermarket support. The high voltage battery packs can be covered by the DAF MultiSupport repair and maintenance package, guaranteeing 70% State of Health for 8 years or 4 MWh/kWh, whichever comes first.

Route Simulation and charging infrastructure

With our advanced route simulator we can accurately estimate your range needs based on your vehicle and battery configuration and the intended usage. We at DAF will analyse your intended driving route and pattern. You will receive expert recommendations on the number of batteries required and the charging strategy that should be applied. With a flexible range of charging options the charging solution will be tailored to your business operation and priorities. DAF offers onboard AC chargers and external DC chargers with the best matching charging infrastructure and services.

Your electrification journey

We are here to guide you through your electrification journey. It all starts with the customer need. We analyse your case and identify what adds value to your business. Together we define the most relevant solution that drives your success. We deliver premium products and services and stay close to you with our extensive dealer network and reliable partners. We will secure your first steps and ensure that you gain the maximum potential and lifetime value from your DAF Electric trucks.

A DAF dealer is never far away. Throughout Europe, our customers can count on around 1,000 DAF dealers and sales & service points for tailored advice and impeccable service.

NEW GENERATION DAF ELECTRIC

Driving zero emissions

Updated version

Sustainable road transport

DAF continues to shape the future of road transport with the introduction of the New Generation DAF electric trucks. These impressive models leverage the capabilities of the existing, multi-award-winning New Generation DAF trucks. And they take full advantage of Europe's new regulations governing truck design, with enhanced aerodynamics, excellent energy efficiency and more interior space. Adding to its already strong reputation for efficiency, safety and driver comfort, DAF has now established a new benchmark for cleaner, quieter and even more sustainable road transport.

This complete range of heavy- and medium-duty electric vehicles includes the New Generation DAF XB, XD and XF Electric models. They bring extremely competitive total cost of ownership to customers operating in city and regional distribution, construction, shuttle services and refuse collection. DAF is committed to helping its customers maximise the value of products and services during their complete product lifetime. In this way, business operations become more sustainable, driving success.

DAF XB ELECTRIC

Clean, silent, compact and highly manoeuvrable, the XB Electric is a truck built specially for the city. The onboard AC charger, which enables charging everywhere, and the DC charger for fast charging, provide real operational flexibility. Range up to 350 km.

DAF XD ELECTRIC

Advanced safety features. State-of-the-art powertrain. Superb driver comfort. Low mounted cab. Characteristics that make the XD Electric ideal for regional and city distribution. An all-round transportation solution for zero emission applications. Range up to 500 km.

DAF XF ELECTRIC

The highly efficient electric motor and Lithium Ferro Phosphate (LFP) high density battery packs guarantee outstanding performance and the highest durability in all of DAF's electric vehicles. With the unparalleled interior and exterior design, the XF Electric is a premium choice for regional or national haulage. Range up to 500 km.
